me a car with what iv done to it and runs as good as this with all service records then i would have to say its a miracle. but unless your selling something or making me an offer for the car then why are you post? John Smith <some...@microsoft.com wrote in message that's the funny thing about cars, you can spend 5 thousand bucks on a car, even 10 if it had alot of things wrong and it'll still only ever be worth 1. Besides, a repaired car is worth alot less than a car that's never had any problems =) for a 15 year old car, with huge mileage, no power locks or windows, i'd feel bad for anyone spending over 700 bucks on this. jeff <cybersurfer...@hotmail.com wrote in message 1990 plymouth laser newer rebuilt 1.8L engine newer transmtion with 180000kms on it and warranty. power steering power brakes tilt steering manual locks manual windows no rust what so ever good shiny paint with a few rock chips. all fluids flushed all new ignition components new battery have allmost all receipts for all parts. i am asking \$3000 FIRM i ask this to cover the cost of all the items iv had to replace this car comes ready to go with an inspection if wanted. you can reach me at cybersurfer...@hotmail.com or call me at 417 5322 and ask for jeff. pictures are allso available as of twomorrow.
